

Héctor Boix

*Hospital Universitario Materno Infantil Vall d'Hebron, Barcelona, España.*

Héctor Boix is the Neonatal Research Coordinator of the Vall d'Hebron University Hospital. He obtained his medical degree from the Universidad de Valencia (Spain) after spending the last two years at the Université Libre de Bruxelles (Belgium) granted by the ECTS-ERASMUS Project. Dr Boix then moved to London (United Kingdom) where he completed his paediatric residency. It was at King's College Hospital where he became interested in Neonatology and in neonatal neurology in particular. After spending a year at the Monash Medical Centre in Melbourne (Australia) he finally returned to Spain. He is member of the Board of the Spanish Neonatal Society, member of the Research Committee of the Spanish Neonatal Society.

He has been involved in clinical research related to birth asphyxia and neuroprotection. His current research is focused on the impact of the first hours of life on the neurodevelopmental outcome.
